Dharmendra Yadav

Software Engineer — API Integration & Implementation — Java — Node.js/NestJS — SQL — AWS

Kathmandu, Nepal | +977 9818722214 | davidyadav9818@gmail.com | LinkedIn | GitHub | Portfolio

Software Engineer with 2+ years of experience designing and integrating REST APIs, working with relational databases (MySQL, PostgreSQL), and deploying applications through Docker-based CI/CD on AWS and GCP. Strong in Java, TypeScript, and Node.js, with a track record of debugging, documenting, and delivering client-ready solutions in Agile teams.

Technical Skills

Languages: Java (Java SE & Java EE), TypeScript, JavaScript (ES6+), Python
Integration & Backend: REST API Design & Integration, Node.js, NestJS, Express.js, WebSockets, Data Migration, System Architecture
Databases: MySQL, PostgreSQL, MongoDB, SQL Query Optimization
Cloud & DevOps: AWS (EC2, S3), Google Cloud Platform (GCP), Docker, CI/CD, Git, GitHub, GitLab
Frontend & Testing: React.js, Redux, Tailwind CSS, Jest, Postman
Practices: Agile/Scrum, Code Reviews, Debugging & Troubleshooting, Role-Based Access Control (RBAC)

Professional Experience

Full Stack Developer April 2026 – Present
Appharu.Tech

- Developed and maintained end-to-end React.js/TypeScript applications, integrating REST APIs with backend services to support core product workflows.
- Diagnosed and resolved defects, tested features, and conducted code reviews within Agile sprints, improving CI/CD release reliability across frontend and backend.

Full Stack Developer May 2025 – March 2026
NavaNexa.Tech Pvt. Ltd.

- Built and integrated REST APIs with Node.js/NestJS and Express to connect frontend and backend systems in full-stack applications.
- Deployed applications through Docker-based CI/CD pipelines and contributed to code reviews to keep code clean, maintainable, and efficient.
- Translated product and design requirements into working features, collaborating in technical discussions and debugging sessions to resolve issues.
- Developed mobile-responsive applications using modular architecture patterns to reduce technical debt.

Relevant Projects

Student Management System (ERP) | React, NestJS, PostgreSQL

- Designed REST API endpoints and a relational PostgreSQL schema for a multi-portal system covering student, staff, LMS, and admission workflows.
- Implemented authentication, role-based access control (RBAC), and dashboards for each portal.

Vrit – E-Commerce Dashboard | Next.js, TypeScript, Firebase

- Integrated third-party payment gateway APIs to enable secure end-to-end checkout in a production-ready dashboard.
- Implemented Firebase authentication and storage, plus cart, wishlist, and order summary features.

Nchat – Real-Time Chat Application | React Native, Node.js, Socket.io, AWS

- Built a real-time application using WebSockets and backend REST APIs on AWS, with authentication and RBAC, within an Agile team.

Education

Bachelor of Technology – Computer Science and Engineering 2021 – 2025
Chandigarh University, India
